Professional Summary

Frontend Software Engineer specializing in scalable web application development using **Next.js, TypeScript, and modern React ecosystems**. Experienced in building production-grade dashboards, role-based systems, and API-driven applications using **React Query, JWT authentication, and Backend-for-Frontend (BFF) architecture**. Proven ability to deliver reusable UI systems, optimize frontend workflows, and contribute to multiple concurrent internal and client projects. Currently expanding expertise in system architecture, performance optimization, and team leadership.

Technical Skills

Frontend: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui

State & Data Management: React Query, Zustand

Backend Integration: REST APIs, JWT Authentication, BFF Architecture

Core Concepts: Role-Based Access Control (RBAC), Dynamic Forms, Responsive Design, Component Architecture

Tools: Git, GitHub, Canva, Adobe Premiere

Others: UI/UX Principles, PDF Generation

Languages: English, Filipino/Tagalog

Experience

Linoflap Technology Philippines Inc.

Ermita, Manila

Software Engineer

Nov 2025 – Present

- Lead frontend development for production-grade web applications using Next.js, TypeScript, and Tailwind CSS
- Designed and implemented scalable frontend architecture using BFF patterns and reusable component systems
- Integrated complex backend APIs with authentication workflows using JWT and role-based access control (RBAC)
- Managed server-state and caching strategies using React Query to improve data consistency and performance
- Delivered multiple internal and client-facing systems including dashboards, management tools, and workflow platforms
- Contributed to architectural decisions and frontend standards across multiple projects
- Provided technical mentorship and guidance to interns and junior developers
- Collaborated with cross-functional teams to improve usability, system performance, and development efficiency

Linoflap Technology Philippines Inc.

Ermita, Manila

Associate Software Engineer

May 2025 – Nov 2025

- Developed and maintained scalable frontend applications using Next.js, TypeScript, and Tailwind CSS
- Built reusable UI components and dynamic forms used across multiple internal systems
- Implemented JWT-based authentication and role-based access features for enterprise applications
- Integrated REST APIs to support real-time dashboard data and operational workflows
- Supported multiple concurrent projects in a fast-paced development environment
- Improved frontend code reusability and consistency across applications

Linoflap Technology Philippines Inc.

Ermita, Manila

Web Developer Intern

January 2025 – April 2025

- Developed responsive UI components using Next.js, Tailwind CSS, and shadcn/ui
- Assisted in API integration and backend connectivity for dashboard features
- Contributed to frontend enhancements, reusable components, and UI improvements
- Participated in debugging, testing, and collaborative development workflows
- Transitioned into full-time role after successful internship performance

Freelance

Remote Work

Frontend Software Engineer

October 2025 – Present

- Built a custom inventory management system focused on operational efficiency and usability
- Developed reusable UI components and data-driven dashboard interfaces
- Integrated authentication and backend APIs for real-time inventory operations
- Designed scalable frontend workflows supporting business process automation
- Improved user experience through optimized UI structure and responsive design

Selected Projects**Real-Time Operations Dashboard System**

Next.js, TypeScript, React Query, JWT Authentication

- Built a real-time dashboard using Next.js, TypeScript, and React Query
- Implemented authentication and role-based access control using JWT
- Developed query-based filtering and optimized API state management

Payroll & Management System

Next.js, TypeScript, PDF Generation, Token Authentication

- Developed payroll processing workflows and crew management features
- Implemented PDF generation for reports and payroll outputs
- Built secure authentication system using token-based access

Realty CRM & Marketing Management System

Next.js, TypeScript, Role-Based Access Control

- Built CRM system with role-based access control and multi-user workflows
- Designed scalable dashboards for marketing and client management operations
- Implemented secure authentication and modular UI architecture

Inventory & Management System

Next.js, TypeScript, JWT Authentication, PDF Generation

- Developed inventory tracking and monitoring platform with real-time updates
- Built reusable components for operational dashboards
- Integrated backend APIs and PDF export functionality

Education

COLEGIO DE SAN JUAN DE LETRÁN

Bachelor of Science in Information Technology,

Thesis: A Dynamic Web-Based Information Management System for Barangay Olympia, Makati City

With Academic Distinction

Intramuros, Manila

June 2025

PACO CATHOLIC SCHOOL

Achiever

Paco, Manila

May 2021
